

# MAGENTO EVENTS CHEAT SHEET (extracted from Magento 1.3.0)

by Branko Ajzele

*This file is generated with “search / replace all” method, and might not reflect the real stuff. Some event names are determined at runtime and are show in this table by simply pointing to variable name like “\$eventName” or “admin\_system\_config\_changed\_section\_{\$section}”. In cases like these you should really check the Magento source code to see possible event names.*

<b>File</b>	<b>Event name</b>
